The People Want Change

Our survey found that people are very anxious about the future of the United States (Fig. 1). **People are looking for deep changes which neither the Republicans nor the Democrats are providing (Figs. 2 and 3).** We also found that despite the darkness of our times, people are very motivated to engage in politics (Figs. 4 and 5). **These survey results confirm that a significant majority of people are losing faith in our democracy and our politicians.**

Both the Republicans and the Democrats have proven, time and time again, that they are not here to serve us. We're done voting for "representatives" who do not represent us. Our elected officials represent the billionaires, who get richer and richer while we suffer from more wars and economic instability.

Enough is enough! It's time to work together to protect our communities from the violent fallout of failing United States' policies.

We have no option but to save ourselves. If you've been feeling this way, you're not alone. Our survey confirms that you're a part of a growing group of people who can see where this country is heading. Don't sink into despair. When we build and sustain connections with each other, our power grows and our fear fades away.
